23. Problem: (use additional Sheets if necessary)
Continued integration requires a new patch to support EDGRS. This file has been sent to CM in order to be captured and delivered to Goddard DAAC only.

24. Proposed Solution: (use additional sheets if necessary)
Deliver file: "Edgrs2.06apatch.zip", cksum 4149818858, 10343 bytes, received from Steve Adamson, CSC, EDGRS Tech. Lead on 3/22/04 to Goddard DAAC only.

25. Alternate Solution: (use additional sheets if necessary)
Wait for delivery of ECS Synergy 4/Release 7 scripts.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Cannot continue work on EDGRS scripts.

************* Problem (Modified 040206 by ocoates) ***********
Long Description :

A software logic error was found in testing the EDGRS 2.06 release in
TS2 mode. An error message was printed to the
g0_TS2EcUserGroupInfo.040203161241.flt file indicating that the database
the code was attempting to access could not be found in the sysdatabases
table in the master database. This error occurred because the platform
being accessed, in this case g0acg01, did not have the
EcGdDistStatistics database located on it. The EcGdDistStatistics
database is located on the g0acs11 platform. While the platform to
access is entered as a parameter, there is only one platform parameter
for both the mss_acct_db database host and the EcGdDistStatistics
database host. At GSFC, the mss_acct_db database is located on g0acg01.
 It appears that an additional platform parameter, use
rId parameter, and password parameter needs to be added to the argument
list to the s.edgrs file in the edgrs.bat file, and that enhancements
need to be made to the s.edg!rs csh script to read the supplemental
parameters into the argument list to the getEcUserGroupInfo.isql script.

Impact: None to GSFC. The EDGRS software is a external interface that
exports data selected from several OPS databases. EDGRS 2.03 will
continue to be used in OPS mode. The EDGRS 2.06 patch is an extension
to the data that is being exported by the EDGRS 2.03 release.
